PHARMACY FORWARD: PERFORMANCE, COLLABORATION, AND HEALTH TRANSFORMATION

The FIP world congress 2025 aims to explore the evolving role of the pharmacy profession in the context of modern healthcare challenges. The congress will explore how pharmacists can drive forward the performance of healthcare systems, foster meaningful collaborations, and catalyse transformative changes in health outcomes globally. The congress is structured around three subthemes, each addressing key facets of the overarching theme:

“Making it sustainable”

focuses on enhancing global health through sustainable resource use, innovative health solutions, and robust policy frameworks. It addresses key challenges like supply chain efficiency and antimicrobial resistance while emphasising preventive care and digital health.

“Making the system work”

emphasises pharmacists’ roles in enhancing healthcare efficiency through integrated care, patient safety and innovations like telepharmacy and artificial intelligence. This subtheme explores strategies to create an effective, safe and patient-centred healthcare system through collaboration with other healthcare professionals, pharmacoconomics, and policy development.

“Making it personal”

examines the transformative impact of personalised medicines on health care, emphasising pharmacists’ roles in tailoring treatments to improve patient outcomes. It underscores the pharmacist-patient relationship as pivotal for optimising healthcare delivery through communication strategies, patient education, and technological innovations.
